

Since 2012, making a difference for our clients in the Technology and People Management sectors.

We develop, implement, and support Information and Communication Technology (ICT) projects, covering both infrastructure and information systems, including hosting solutions.

Our People Management team operates across all aspects of HR, from job mapping to managing Human Resources and Personnel Department routines.

HTS offers a comprehensive e-learning platform, featuring a vast library of content, including proprietary materials and courses from renowned partners such as Albert Einstein.

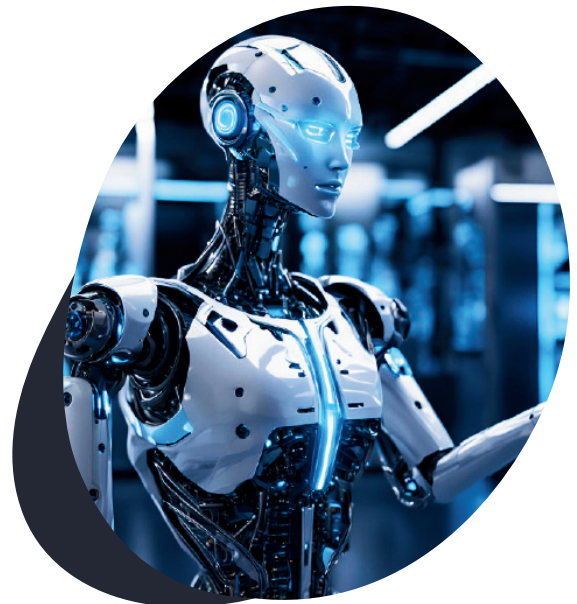

With the creation of our AILA – Artificial Intelligence Labs & Acceleration, we have fully embraced the AI era, delivering cutting-edge solutions that enhance efficiency, productivity, and quality across industries.

HTS E-Learning Platform: Empowering Professionals with Knowledge

The HTS platform offers a wide range of services designed to ensure that employees are always up-to-date and well-prepared to tackle industry challenges.

HTS Tecnologia e Recursos Humanos has an established partnership with Einstein Education, one of Brazil's most respected institutions in the healthcare sector.

This collaboration provides healthcare professionals with access to high-quality content, developed and validated by the Albert Einstein Israeli Hospital.

Our platform enables professionals in remote areas to access top-tier training, ensuring high-quality education regardless of geographical location.

HTS delivers a comprehensive training solution, from assessing employee training needs to tracking engagement and presenting results on the adoption of learning paths.

- 📖 4,000+ online students
- 🕒 500+ hours of recorded training
